

Dr. Bernhard Holtkamp

is with the Fraunhofer Institute for Software and Systems Engineering ISST since 1992. As manager strategic project development he is active in the Fraunhofer Innovation Cluster “Cloud Computing for Logistics” and in the strategy team of Germany's Leading Edge Cluster “Effizienzcluster LogistikRuhr”. In the first phase of the Innovation Cluster he was designated as chief architect for the Logistics Mall project.

For more than 10 years he was head of Fraunhofer ISST's information management department. He was also project manager of the institute's China related projects and deputy director of SIGSIT (Sino-German Joint Laboratory of Software Integration Technologies).

Dr. Holtkamp got his diploma and Ph.D. in computer science from the University of Dortmund in 1982 and 1985, respectively. He was then with the University of Dortmund and worked as a research professor at the Naval Postgraduate School in Monterey, California, before he joined Fraunhofer.

His current research interests include cloud computing, business process management and information logistics.
