

7th European Conference on ICT for Transport Logistics (ECITL)
05th – 07th November 2014
Dortmund (Germany)

Conference focus will be
“ICT drives transport logistics cooperation”

SCOPE

More than other businesses, transport logistics relies on innovative Information and Communication Technologies (ICT). For example, ICT enhances logistics stakeholder abilities for active cooperation in supply chains. Also, through the shared and provided set of data, ICT is recognized as the most important enabler for logistics innovation and allows to create and maintain competitive advantage.

As every year, the ECITL picks-up hot future topics in transport logistics and supply chain and provides a platform where experts from industry and research meet and discuss these imperatives. This year, the conference will focus on how ICT drives transport logistics innovation and cooperation and will deep in topics as intelligent cargo, secure communication in logistics, e-freight common framework, etc. The goals of this year's conference are to identify and discuss the following main topics.

- Opportunities and advantages of increased application of ICT
- Innovations for the future in transport logistics cooperation, which ICT can create
- ICT as enabler for innovative and green logistics
- Co-operative Intelligent Transport Systems (C-ITS)
- Neglected areas, where ICT do not provide sufficient service and how it could be improved
- Enhanced information exchange opportunities through ICT
- Safety & Security in logistics as well as ICT as enabler of safety & security
- Safe and secure data exchange

We would be delighted to welcome you in Dortmund!

EUROPEAN CONFERENCE ON **ICT**

The ECITL 2014 consists of a Scientific Day and two Industry Days:

- **Scientific Day – 05th of November 2014, 12:00 am**

The Scientific Day is the opening session of the ECITL 2014. Innovative concepts and research results in the field of ICT for Transport Logistics and Supply Chain Management will be presented. Each presenter will have a slot of 20 minutes plus 10 minutes of discussion.

The **Call for Papers** will close on 31st of July – get more information on the ECITL website.

- **Industry Days – 06th & 07th of November 2014, 09:00 am**

The Industry Day is organized in Plenary Sessions (Executive Sessions) and Parallel Sessions.

- **Plenary Sessions (Executive Sessions)**

In Plenary Sessions chosen innovation issues in the field of ICT for Transport Logistics and Supply Chain Management will be presented by key personalities from the European Commission and European Projects.

- **Parallel / Special Interest Sessions**

The Parallel Sessions are tailor-made and focusing on the special interests of the participants of the ECITL. These sessions delve into industrial projects and offer new perspectives, approaches and insight.

TARGET GROUPS

The target groups of the ECITL are all stakeholders and investors who are involved in the field of Transport Logistics, Supply Chain Management and Information and Communication Technologies (ICT).

CONGRESS LANGUAGE

The official language of the conference is English.
