Intelligent Cargo in Efficient and Sustainable Global Logistics

Dear Ladies and Gentlemen,
Dear Friend,

by the end of May, the European Union Research Project "Intelligent Cargo in Efficient and Sustainable Global Logistics Operations" (iCargo) comes to its end. At this date, the iCargo consortium had **43 months of intensive research, testing, and prototyping** in the field of transport logistics and supply chain management in conjunction with emerging Information- and Communication Technologies (ICT).

With this mail, we would like inviting you to the iCargo's Final Event Session. This session will be organized during the Transport Logistics Trade Fair 2015 in Munich (Germany) and aims **presenting the achieved research outcomes including business, technical and pilot demonstration**. We are delighted welcoming presenters from world's leading organizations as DHL, Unilever, ATOS, CGI, etc.
